Animal By-products
Rubber and Synthetics
H.M. Prisons
Soap and Detergent Manufacturers

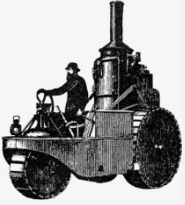

Welded Fireboxes

We have manufactured all shapes and sizes of welded firebox for over thirty years, building up a large quantity of firebox endplate and wrapper tooling to enable us to hot form both endplates and wrappers. Our Flanged and Butt Welded Fireboxes are built to the latest Insurance standards. Each firebox is 100% NDT tested to prove there are no flaws in the welding. Certification is supplied on completion.

Riveted Fireboxes

A traditional riveted firebox still has much appeal due to the feel of originality it brings to a restoration, and the aesthetic value of the riveting work. Using the traditional techniques of flanging endplates and hot forming wrapper plates, and then finally riveting the sections together and caulking the seams to seal, a riveted firebox bears all the resemblance of being built 100 years ago.

"I am pleased to report that McEwen Boilermaker's carried out the entire contract safely, keeping within timescale and budget. McEwen's approach to their work is extremely professional and I would recommend them unreservedly."
